

ePoster Oral Presentation Programme - Tuesday 5th December 2023

Session 2 – 12:40 – 13: 20

Abstract Type:

Acute Care

Screen 1 [The effect of perihaematomal oedema and expansion and outcomes in deep and lobar intracerebral haemorrhage: data from the RIGHT-2 and Tranexamic Acid for hyperacute intracerebral haemorrhage-2 \(TICH-2\) trials](#)

Presented by Kailash Krishnan, Consultant in Stroke Medicine

Screen 2 [Poster no longer in programme](#)

Screen 3 [Pre-hospital video triage for suspected stroke patients: a service evaluation](#)

Presented by Ibrahim Alghamdi, PhD student

Screen 4 [Statistical analysis methods versus artificial neural network models for diagnosis and outcome prediction: results from the SAVANNAS Collaboration Study](#)

Presented by Lisa Woodhouse, Research Fellow - Medical Statistician

Screen 5 [Triple antiplatelet therapy vs guideline therapy in patients with acute cerebral ischaemia on prior antiplatelets: a pre-specified secondary analysis of the tardis trial](#)

Presented by Jason Appleton, Consultant Stroke Neurologist

Abstract Type:

Case Reports and Interesting Cases

Screen 6 [Eagle syndrome not to be missed](#)

Presented by Tariq Soliman, Specialty doctor in stroke medicine

Abstract Type:

Cognitive, Emotional and Psychological

Screen 7 [Developing resources for a post-stroke cognitive care pathway using a qualitative co-production approach.](#)

Presented by Georgina Hobden, PhD (DPhil) student

Screen 8 [Digital v. real-life Multiple Errands Tests: a comparison of OxMET and MET-Home including convergence, feasibility & acceptability.](#)

Presented by Sam Webb, Doctoral Candidate

Screen 9 [Infection, inflammation and post-stroke cognitive impairment](#)

Presented by Elise Milosevich, Postdoctoral researcher

Abstract Type:

Primary Care

Screen 10 [Stroke prevalence and long-term management in General Practice in areas of socioeconomic deprivation in the North East of England](#)

Presented by Ania Pawlak, Clinical Research Associate and GP

Abstract Type:

Primary Prevention and Risk Factors for Stroke and Genetics

Screen 11 [Stroke Prevention in Atrial Fibrillation: Can Percutaneous Left Atrial Appendage Occlusion Do Better Than Oral Anticoagulant Therapy?](#)

Presented by Sandra Moawia Siddig Elsheikh, Clinical Research Fellow

Abstract Type:

Rehabilitation

Screen 12 [The effect of Vestibular Rehabilitation on balance in adults with Stroke: a systematic review and meta- analysis.](#)

Presented by Rebecca Rayner, Clinical Lead Neurosciences Physiotherapist

Screen 13 [The importance of context - A qualitative study exploring healthcare practitioners' experiences of working with patients at home after a stroke](#)

Presented by Maya Kylén, Researcher

Screen 14 [Ultrasound image guided injection of botulinum toxin for the management of spasticity: A Delphi study to develop a international scope of practice, competency, and a governance framework.](#)

Presented by Stephen Ashford, Consultant Physiotherapist and Honorary Reader

Screen 15 The impact of introducing an adult social care practitioner (ASCP) role to an Integrated Community Stroke Services (ICSS)

Presented by Joanne Buck, stroke project lead

Abstract Type:

Secondary Prevention and TIA

Screen 16 Is mobile health delivered physical activity feasible and acceptable in individuals post stroke and transient ischaemic attack?

Presented by Charlotte Thurston, PhD student

Screen 17 Structured follow-up pathway to support people after transient ischaemic attack and minor stroke (SUPPORT TIA): feasibility study

Presented by Grace Turner, Research fellow

Abstract Type:

Health Economics, Quality Improvement, Service Development (Research), Education and Training

Screen 18 Quantifying the relative probability of treatment for stroke patients in England, Wales and Northern Ireland admitted to hospitals without a thrombectomy service on site: an uncomfortable gap.

Presented by Christopher Price, Professor
