Private treatment

You can choose private health treatment for all medical conditions, including stroke. If you are considering private treatment this factsheet explains what treatments are available for stroke and some of the things you should consider before deciding if it is right for you. It also provides a list of other organisations that can help you in your search for safe and reliable private treatment.

What is private treatment?

In the UK most of the care you receive from the NHS is free at the point you receive it. Any health treatment you pay for yourself, either directly or through medical insurance, is known as private treatment.

Why would I consider private treatment?

Some people choose to be treated privately because:
- NHS waiting lists can be long and they want to receive treatment quickly
- they want to continue a treatment that is only available through the NHS for a fixed period of time
- the treatment they want is not offered by the NHS
- they want to choose where and when they receive their treatment or they want to be treated by a particular specialist.

What private treatments are available for stroke?

Different types of assessments and treatments for stroke are available privately. They include:
- prevention services to test for the risk factors that can cause a stroke
- diagnosis to confirm whether you have had a stroke or not
- rehabilitation after you have had a stroke.

Prevention services

If you have had a stroke or transient ischaemic attack (TIA) your doctor will conduct a series of tests to find out what caused it. These will include tests for high blood pressure, high cholesterol and other health conditions such as diabetes or an irregular heartbeat (atrial fibrillation).

If you think you are at a high risk of stroke you may want to be tested for these things privately. You can also be tested for carotid artery disease, which is when the two large blood vessels at the front of your neck become narrower. However, this test is only usually recommended after a stroke or TIA.
Private treatment

Diagnosis

A computer tomography (CT) scan or a magnetic resonance imaging (MRI) scan can produce images of your brain to confirm whether or not you have had a stroke. You will usually have one of these scans when you are admitted to hospital with a suspected stroke. However, if your doctor thinks you may have had a stroke some time ago, having one of these scans privately may be able to confirm this for you.

Rehabilitation

If you’ve had a stroke the doctors, nurses and therapists in your care team will work with you to decide what rehabilitation services you need. These services should be available to you, at least initially, through the NHS, but you can also pay for them privately. Sometimes rehabilitation after stroke is called neuro-rehabilitation.

Some of the rehabilitation therapies that are available privately include:

- **physiotherapy** for help with mobility, muscle weakness and balance problems
- **speech and language therapy** for help with communication difficulties or swallowing
- **occupational therapy** for help with regaining independence in everyday activities
- **clinical psychology** for help with cognitive problems such as memory loss or poor concentration, or for help with the emotional impact of stroke such as depression, anxiety and personality changes.

Can I have private and NHS treatment at the same time?

Having private treatment should not affect your right to treatment from the NHS. If you are receiving treatment from the NHS and extra private treatment would help you, you can have both.

Your private treatment should be carried out at a different time and in a different place to the treatment you receive from the NHS. Make sure you **tell your doctors and therapists about all of the treatments you’re receiving**, so that they can be aware of any issues and ensure that your care is consistent.

How do I pay for private treatment?

The costs for private treatment can vary greatly depending on where you live and the type of treatment you are looking for.

Usually **private treatment is paid for through a medical insurance policy or directly from your own money**, which is called self-funding. With some insurance policies you will have to pay for the treatment yourself and then claim the money back, whereas others will pay the hospital or therapist for you.

If you have medical insurance, **make sure you read your policy carefully before you start** treatment. It’s best to contact the insurance company to get their written agreement that they will pay and to find out:

- whether they will cover the whole cost of the treatment, or whether there are some costs that you will have to cover yourself
**Private treatment**

- whether they will accept a referral from your GP or if the company has its own consultant that you may have to speak to.

**What should I do if I am considering private treatment?**

The first thing you need to do is **speak to your GP**. He or she will be able to tell you about all the treatments available to you, both privately and through the NHS.

Although doctors cannot advertise private services to their patients, your GP will be able to **advise whether a particular treatment is suitable for you and help you to consider your options**. And even though it is possible to have private treatment without consulting your GP, it’s recommended that you do speak to him or her first.

You then need to do some research. If you can, contact a few private therapists or hospitals near to you to compare the services they offer and how much they cost. This will help you to make an informed decision.

The Citizen’s Advice Bureau offers advice about what you should consider when buying private healthcare. Visit their website [www.adviceguide.org.uk](http://www.adviceguide.org.uk)

If you do decide to have treatment privately you need to **make sure that the therapist or specialist you use is registered** with the professional body that regulates their area of work – these are all listed in the **Other useful contacts** section of this factsheet.

We also recommend that any rehabilitation therapist you use has experience in working with people affected by stroke.

**How can I find out more?**

**Talk to us**

At the Stroke Association, our helpline team can give you information about stroke and tell you about services and support available in your local area.

Call us on **0303 3033 100** (Monday to Friday, 9am-5pm) or email info@stroke.org.uk

**Get online**

We have lots of information about stroke and how to prevent it on our website. Go to [stroke.org.uk](http://stroke.org.uk)

**Read our publications**

We also produce a range of other leaflets and factsheets about stroke and related issues. You can download these for free or order a printed copy to be posted to you via our website [stroke.org.uk](http://stroke.org.uk) or by calling the helpline on **0303 3033 100**.

**Other useful contacts**

If you’re looking for more information the following organisations may also be able to help. All are UK wide unless otherwise stated.

Please note that details of these organisations are for information only. We are not recommending or endorsing anyone by including them in this factsheet.

**Finding a private hospital**

**BMI Healthcare**

**Website:** [www.bmihealthcare.co.uk](http://www.bmihealthcare.co.uk)

**Tel:** 0808 101 0337 (Advice line)

Runs 69 private hospitals across England, Scotland and Wales offering treatments including physiotherapy and speech and language therapy.

Private treatment

Finding a rehabilitation service

Health and Care Professions Council (HCPC)
Website: www.hpc-uk.org
Tel: 0845 300 6184
An independent UK wide regulator, which keeps a register of health and care professionals who meet their standards. Use their website to find out if a professional is registered with them, as it is illegal to practise in the UK if you are not. This includes occupational therapists, physiotherapists and speech and language therapists, but not nurses or doctors.

Finding a physiotherapist

Chartered Society of Physiotherapy (CSP)
Website: www.csp.org.uk
Tel: 020 7306 6666
The professional and educational body for the UK’s chartered physiotherapists, physiotherapy students and assistants.

Physio First
Website: www.physiofirst.org.uk
Tel: 01604 684 960
Email: minerva@physiofirst.org.uk
This is a CSP group for members in private practice. You can use the website to search for a private physiotherapist near you.

Finding a speech and language therapist

Association of Speech and Language Therapists in Independent Practice (ASLTip)
Website: www.helpwithtalking.com
Tel: 01494 488 306
This website provides a search function to find private speech and language therapists across the UK, including those who specialise in working with stroke patients (listed under ‘acquired brain injury’) and those able to work in languages other than English.

Royal College of Speech and Language Therapists
Website: www.rcslt.org
Tel: 020 7378 1200
Email: info@rcslt.org
Represents speech and language therapists and support workers and promotes good practice.

Finding an occupational therapist

British Association of Occupational Therapists and College of Occupational Therapists
Website: www.cot.co.uk
Tel: 020 7357 6480
The professional body for all occupational therapy staff in the UK.

The College of Occupational Therapists Specialist Section – Independent Practice
Website: www.cotss-ip.org.uk
Tel: 020 7989 0681
Email: enquiries@cotss-ip.org.uk
Provides an online directory of qualified, private occupational therapists.

Finding a psychologist or counsellor

British Psychological Society (BPS)
Website: www.bps.org.uk
Tel: 0116 254 9568
Email: enquiries@bps.org.uk
The representative body for psychologists in the UK. The website has a directory, which you can use to search for private psychologists who are qualified to carry out after-stroke assessments.
Private treatment

British Association for Counselling and Psychotherapy (BACP)
Website: www.bacp.co.uk
Tel: 01455 883 300
Email: bacp@bacp.co.uk
A professional body that registers accredited counsellors and psychotherapists and can provide advice and information for anybody seeking counselling or therapy. You can use their website to find qualified practitioners in your area.

Counselling & Psychotherapy in Scotland (COSCA)
Website: www.cosca.org.uk
Tel: 01786 475 140
Email: info@cosca.org.uk
Scotland’s professional body for counselling and psychotherapy. You can use the online directory to find a qualified private therapist in most parts of Scotland.

Finding a residential rehabilitation service

Barchester Healthcare Ltd
Website: www.barchester.com
Tel: 020 8242 6472
Runs a number of care homes throughout the UK providing 24-hour care and a range of services including neuro-rehabilitation and respite care.

Brain Injury Rehabilitation Trust (BIRT)
Website: www.thedtgroup.org/brain-injury
Tel: 01924 266 344
Email: director@birt.co.uk
Runs residential rehabilitation centres and supported housing across England and one in Scotland. They work with people aged 18 to 65 who have brain injuries including those caused by stroke. They also have a neuro-rehabilitation centre located at Goole NHS Hospital in Yorkshire.

Hunters Moor Neuro-rehabilitation Centre for the West Midlands
Website: www.huntersmoor.com
Tel: 0121 777 9343
Email: info@huntersmoor.com
Provides behavioural and rehabilitation support in Birmingham and north east England.

Leonard Cheshire Disability Acquired Brain Injury (ABI) Services
Website: www.lcdisability.org
Tel: 020 3242 0200
Email: info@lcdisability.org
Supports people with acquired brain injuries who are ready to leave hospital but still need specialist rehabilitation. They offer rehabilitation services in England, Scotland and Wales and living support in Northern Ireland, as well as UK wide short breaks, home care and leisure services.

Queen Elizabeth’s Foundation for Disabled People
Website: qef.org.uk
Tel: 01372 841 100
Email: neurorehab@qef.org.uk
Offers neuro-rehabilitation services for adults aged 16 to 65.

Strode Park Foundation
Website: www.strodepark.org.uk
Tel: 01227 373 292
Email: info@strodepark.org.uk
Provides short and long-term neuro-rehabilitation for people with neurological disabilities.
Finding a non-residential rehabilitation service

**Association for the Rehabilitation of Communication and Oral Skills (ARCOS)**
*Website:* www.arcos.org.uk  
*Tel:* 01684 576 795  
*Email:* admin@arcos.org.uk  
Offers professional therapy to people with communication and swallowing problems, including those caused by stroke. Also offers outreach services.

**Action for Rehabilitation from Neurological Injury (ARNI Institute)**
*Website:* www.arni.uk.com  
*Tel:* 07712 211 378  
*Email:* support@arni.uk.com  
Trains and certifies specialist instructors to deliver tailored exercise programmes for stroke survivors throughout the UK.

**The Bobath Centre for Adults with Neurological Disability**
*Website:* www.bobath.co.uk  
*Tel:* 020 8444 3355  
*Email:* enquiries@bobath.co.uk  
Provides specialist therapy for adults with acquired neurological conditions, including stroke.接受 referrals from consultants and GPs.

**National Institute of Conductive Education**
*Website:* www.conductive-education.org.uk  
*Tel:* 0121 422 5564  
Conductive education is a group-based rehabilitation programme developed for people who have problems with movement because of a neurological condition such as stroke. The first 10 sessions are free, after that there may be a charge. Services are available in Birmingham and Coventry.

**Sight Science Limited**
*Website:* www.sightscience.com  
*Tel:* 07842 106 131  
*Email:* info@sightscience.com  
Provides Neuro-Eye Therapy (NeET), an interactive computer programme that can improve visual sensitivity for people with visual loss.

**National Clinical FES Centre**
*Website:* www.salisburyfes.com  
*Tel:* 01722 429 065  
*Email:* enquiries@salisburyfes.com  
Offers clinical functional electrical stimulation (FES), which is a treatment for drop foot using small electrical signals.

**General advice and information**

**Association of British Insurers (ABI)**
*Website:* www.abi.org.uk  
*Tel:* 020 7600 3333  
*Email:* info@abi.org.uk  
Represents the UK's insurance industry. Provides independent information for consumers on all aspects of insurance including health insurance.

**British Brain & Spine Foundation**
*Website:* www.brainandspine.org.uk  
*Tel:* 0808 808 1000 (Helpline)  
*Email:* helpline@brainandspine.org.uk  
Offers general information on brain and spine conditions and a helpline staffed by neurology nurses. You can find your nearest neurological centre using the map on their website.

**Citizens Advice Bureau**
*Website:* www.adviceguide.org.uk  
Offers independent advice on buying private healthcare and health insurance.
Private treatment

Headway
Website: www.headway.org.uk
Tel: 0808 800 2244
Email: helpline@headway.org.uk
Supports people with brain injuries. They run local groups and a helpline and offer a range of useful publications. They also have a directory of brain injury resources in the NHS and private residential sector.

UK Acquired Brain Injury Forum (UKABIF)
Website: www.ukabif.org.uk
Tel: 0845 608 0788
Email: info@ukabif.org.uk
A coalition of organisations and individuals that aims to provide information and advice to policy makers, service providers and the public. It has local forums and an online directory of private rehabilitation services.

How did we do?
Your feedback will help us to improve our publications, making sure that they answer your questions and are easy to understand.

To let us know what you think of this factsheet email info@stroke.org or go to stroke.org.uk and complete our online form.

About our information
We are committed to producing clear, accurate and unbiased information for stroke survivors, their families and friends. To produce our publications we use information from professional bodies and other reliable sources including NICE, SIGN, Royal College of Physicians, medical journals and textbooks. For a list of all the sources used in this factsheet go to stroke.org.uk
