Are you looking for a cost-effective way to deliver stroke awareness across your organisation?

Stroke has a sudden and devastating impact. It is the largest cause of severe adult disability and is one of the leading causes of death.

The Stroke Association is the UK’s leading stroke training provider for health and social care professionals. We have developed this programme to provide professional trainers with the knowledge, resources and ongoing support to deliver evidence-based ‘stroke aware’ sessions within their organisation.
Training for trainers
This programme offers an effective solution to raising awareness of stroke, how it can be prevented and how it should be responded to in an emergency. A FAST response to stroke reduces the risk of death and disability.

The programme
Our Training for Trainers course aims to give health and care sector trainers the opportunity to develop their own knowledge of stroke and then the necessary skills and confidence to deliver the ‘Stroke aware’ education session within their work place. They will also gain a nationally recognised Level 2 qualification in Stroke Awareness and Acquired Brain Injury, worth £90.

“Very enjoyable training, full of knowledge and useful information. The trainer was very approachable and made the learning effortless. Thank you.” March 2016 delegate

Following the 2 day course, the trainer will become a Stroke Awareness Lead and is able to deliver a ‘Stroke Aware’ education session covering the following learning outcomes:

- What is stroke and vascular disease.
- The risks of stroke and how it can be prevented.
- The effects and impact of stroke on the individual.
- Communication challenges after a stroke.
- How the Stroke Association can help.

Experience and Expertise
Our training materials have been developed by leading stroke experts and those affected by stroke. This ensures up-to-date evidence-based learning and a unique insight into what it’s like living with the effects of stroke. Those attending will receive ongoing support and updates.

Flexible delivery options
We can provide this training in your workplace for 10-12 people or individuals can attend one of our Individual Access courses, held at various locations across the UK. Please be aware this is a popular course, and places are limited to ensure optimal learning.

Cost effective
The Stroke Association subsidises all our training programmes to make them as cost effective as possible. We also provide additional limited-time offers and funding on our training where possible.
