

<p>Completed Studies</p> <p>Submit under this type if your results and conclusion or your research are available at the time of submission.</p>	<p>Service development (brag and steal)</p> <p>Submit under this type if your abstract is a more local QI project or service evaluation that has been designed and implemented in practice with some successful results or key learning points that would be worthwhile sharing with the stroke community.</p> <p>All submissions, if accepted, will be considered for either an e-Poster presentation or an oral presentation.</p> <p>Please present here your experiences with service development and quality improvement, if positive or negative, to allow others to learn from your experiences.</p> <p>Abstracts under this type will also be considered for a specific ‘Brag and Steal’ session where delegates can learn and adapt ideas from other stroke teams to improve their own practice.</p> <p>Explanation for Service development: ‘Brag and Steal’ comes from the idea that authors can ‘brag’ at the conference about the changes they have made to their health service delivery in their hospitals and other delegates can ‘steal’ the ideas.</p>	<p>Case Reports</p> <p>Please submit all case reports and small case series in this category. We are interested in cases which illustrate clinical conditions, diagnostic challenges, treatments, and complications.</p> <p>Please use the same format as for the research abstracts but replace the research question with a statement about why the case is important and the methods section with a description of the case/cases. The discussion should focus on what we learn from the case.</p>
<p>Late breaking clinical trials or other well designed studies</p> <p>Submit under this type if your study is large and practice changing , if the full analysis of the clinical trial or study results will not be completed by the abstract submission deadline (Thursday 23 May 2024, 5pm BST) but will be completed by the date of the conference (Tuesday 3 to Thursday 5 December 2024).</p>		
<p>Ongoing clinical trials or other studies</p> <p>Submit under this type if your trial or study is ongoing and will not be able to present results or conclusions by November 2024.</p>
